Submerged Arc Furnace Transformer

- > Arc Furnace Transformer
- > Ladle Furnace Transformer
- > DC Arc Furnace Transformer

Sub Merged Arc melting furnace transformers are manufactured in 3 phase system up to 11 MVA

Three phase units are available in three ways

- > Tap winding are in series with main HT windings in one core frame and in one tank with OLTC
- > Tap Windings are separated through auto transformer in addition to main transformer, but both the transformers are in one common tank.
- > Tap winding are through an auto transformer in separate tank with OLTC and main transformer is in another tank
